CERTIFIED THERMAL THERAPY COURSES

CPD ACCREDITED
COURSES

AdvancedCryo deliver trusted, evidence-based online clinical training, developing professionals beyond device operation into highly qualified CryoSpecialists meeting elite clinical standards.

AdvancedCryo are a global leader in Cryotherapy education, providing specialist training and expert support to the wellness, sports and rehabilitation sectors. AdvancedCryo qualifications are designed to regulate the industry and ensure professionals can successfully integrate and maximise the performance of their thermal therapy investments.

We equip therapists with in-depth clinical knowledge of both cold and heat therapies, supported by evidence-based guidelines and practical prescribing strategies that enhance client management, improve treatment outcomes and strengthen the ability to confidently sell structured treatment courses – driving business performance through increased sales, referrals and leadership within the wellness industry.

BECOME AN ADVANCEDCRYO* CERTIFIED CRYOSPECIALIST ❄️

QUALIFY AS A THERMAL THERAPY SPECIALIST

Step into a new level of clinical excellence with our industry-recognised Cryotherapy Specialist Certification - a comprehensive, premium online training course designed for those seeking to **master cold and heat therapy**, and confidently lead in the thermal therapy field.

This course equips you with the clinical knowledge and hands-on expertise needed to deliver safe, effective and results-oriented care across a wide range of client needs. Through in-depth, expertly developed modules, you'll explore:

- The science behind cold exposure and heat therapy across all modalities.
- Localised and Systemic Cryostimulation (Cryosaunas, Cryochambers and ice baths): application, processes, guidelines, protocols and safety.
- Confidently prescribe, structure and sell treatment sessions.

- Temperature-based interventions for inflammation, pain & injury management.
- Performance recovery strategies using saunas, contrast therapy and ice baths.
- Breath work integration to support physiological outcomes.

This is the first and only course globally to deliver a complete, clinically relevant CPD accredited education in all forms of cold and heat therapy.

Why does this matter? Because true therapeutic excellence requires more than using a single device, it requires understanding your client's condition, the biological phases of injury and inflammation and choosing the right thermal intervention at the right time. This course empowers you to personalise treatments, manage injuries at every stage and demonstrate unmatched credibility in your field.

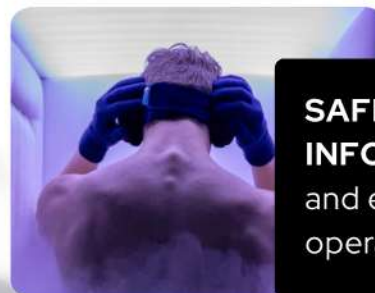

COURSE OVERVIEW

- 11 comprehensive modules
- 1 certification exam
- Access to learning resources

WHO WE ARE?

With over a decade of experience in the Cryotherapy industry, AdvancedCryo delivers expert knowledge in education, clinical application and elite athlete performance recovery.

After delivering 500+ certified clinical trainings and consultations, we identified a key gap - the need for expert-led education that supports therapists' long-term success. With roots in UK medical device distribution, our mission is to bridge this gap through elite training that drives professional and industry growth.

WHAT WE DO?

AdvancedCryo offers a full range of training services, including 4 premium CPD accredited courses, one-to-one clinical webinars and CPD accredited Cryotherapy workshops. We also provide expert consultancy for distributors and manufacturers. Certified CryoSpecialists can also gain exclusive access to our *Guidelines and Protocols* support book, designed to enhance practical application.
